## PROFESSIONAL SKILLS

- Machine Learning
- Deep Learning
- Core Java, Python, JavaScript
- Git, Maven
- Spring, Hibernate
- JSON, REST-services
- iOS Development
- Agile Methodologies
- Test Driven Development
- Project Management

## EDUCATION

### Vrije Universiteit, Amsterdam

*Sept 2019 - Present, Master's in Artificial Intelligence - Cognitive Science*

- Working on a research project with a professor. We are using Computer Vision to track eye movement without doing calibration.
- International student ambassador (2019-2020)

### University of Pune, India

*Sept 2009 - May 2014, B.E. in Computer Science*

- Graduated with First Class degree
- Vice President of Association of Computer Engineers

## WORK EXPERIENCE

### Functional Analytics

*February 2020 - Present, Data Science Intern*

- Developing a prototype to validate and check the efficiency of using Deep Learning on graph dataset.

### Fitsurance

*November 2019 - August 2020, Software Engineer - iOS and Machine Learning Intern*

- Developing an iOS application which constantly monitors users health, based on multiple markers and generates feedback for improvements from a machine learning model.

### Nuance Communications

*February 2018 - June 2019, Software Development Analyst*

- Closely worked with our client JPMorgan & Chase on their campus to assist them on building a voice enabled chatbot which could perform banking transactions from voice commands.
- Worked on Cisco Voice Platform, Avaya Orchestration Design tools to build IVR systems for clients like American Express, FIS, and Florida Light and Power.

### Allianz Technology

*July 2014 - February 2018, Software Engineer*

- Worked and got trained on CISL framework at clients' campus in Vienna for 2 months.
- Single-handedly designed and developed middle layer for Allianz Czech Republic client.
- Managed deliveries and post-delivery tasks by delegation and closely worked with clients on premise in Prague for 3 months.
- Researched, designed, and prototyped multiple ideas while working on the Brailliant Banking iOS application. This application secured first place in the most transformative customer servicing category in City Mobile Challenge 2015.

## FREELANCING EXPERIENCE

- Developed an iOS application for Konverv. It is a school/college management application where authorities post regular updates of all the activities, grades, and timetables.

## ACHIEVEMENTS

- Allianz Technology (2017) - Medal Award, Annual Rewards and Recognition
